# *Outlook*

# Outlook

---

- The global CPO prices had generally been on a downward trend for the past few months although the general consensus was that the prices had hit its low at RM 2,230/ton on 13 December 2012. The trend could be a slow and gradual upward price movement from 2Q 2013 onwards as exports to China and India are expected to improve. The positive fundamentals of the palm oil industry remain unchanged in the long term which continued to be supported by the following factors:
  - a) growth in global consumption of edible oils;
  - b) increase in demand for biofuels;
- The increasing production volumes as the Group's young palm trees mature and reaching peak production age, and positive long term prospects of the palm oil industry will augur well for the Group.
